

4L CONCENTRATED CLEANER SANITISER

Description

A dual purpose product that cleans efficiently and has a broad antimicrobial spectrum specially formulated for cleaning and sanitising applications.

Features and Benefits

Concentrated Cleaner Sanitiser enables cleaning and sanitising to be carried out simultaneously.

For cleaning and sanitising food utensils, glasses, crockery and all types of kitchen equipment and surfaces including fridges, freezers and work surfaces.

Suitable for manual, spray and soak applications.

Broad spectrum of anti-microbial activity and a high rate of kill.

Passes the requirements of EN1276 & EN14476.

Effective in all water conditions.

Virucidal & bactericidal.

Use Instructions

Fill the spray bottle with water and dose 20ml (4%)*.

Remove debris before applying product.

Apply solution via a spray, cloth or brush. Leave for the required contact time.

Rinse thoroughly with clean water and allow to air dry.

A made up solution of product in a spray bottle will be active for up to seven days.

Rinse and dry bottle before refilling.

Application *Standard sanitising* *Rapid sanitising*

Organism Viruses & Bacteria Bacteria

Conditions Dirty Clean

Contact time 5 minutes 30 seconds

Safe handling and storage information

Full guidance on the handling and safe use of the product can be obtained from the Safety Data Sheet.

Store in original container.

Avoid extremes of temperature.

**This dosage is according to optimal conditions, recommendations may vary, please consult with your Diversey representative for directions.*

4L CONCENTRATED CLEANER SANITISER

Technical data

Appearance:	Clear purple liquid
pH:	11 (neat)
Relative density:	1.02
Odour:	Characteristic
Solubility:	Fully miscible in water

The above data is typical of normal production and should not be taken as a specification.

Product compatibility

Safe to use on most materials found in the food and beverage industries including stainless and galvanised steels, and commonly occurring plastics. Compatibility with other materials should be checked prior to use.

Microbiological Activity

Tested independently in accordance with.

EN1276; 2009 at a dilution of 2.7% in hard water (300ppm as CaCO₃) and in dirty conditions (0.3% bovine albumin), in 5 minutes (14ml in 500ml).

EN1276:2009 at a dilution of 2.7% in hard water (300ppm as CaCO₃) and in clean conditions (0.03% bovine albumin), in 30 seconds (14ml in 500ml).

EN14476:2013 +A2:2019 for Vaccina Virus VR-1549 at 3.5% dilution under clean conditions and 1 minute contact time (18ml in 500ml), this therefore includes all Corona viruses and SARS-CoV-2.

EN14476:2013 +A2:2019 for Vaccina Virus VR-1549 at 4.0% dilution under dirty conditions and 5 minute contact time (20ml in 500ml), this therefore includes all Corona viruses and SARS-CoV-2.

EN1650 at a dilution of 2.7% against Candida albicans at 20°C under dirty conditions with a 5 minute contact time (14ml in 500ml).

EN16615 with a 2.7% dilution under dirty conditions with a 5 minute contact time (14ml in 500ml). * to be effective against all the above organisms and conditions dilute to 4% (20ml in 500ml)

EN14476:2013 +A2:2019 for Vaccina Virus VR-1549 at 6.7% dilution under dirty conditions with a 1 minute contact time (34ml in 500ml).

EN1276 and EN1650 at 4°C at 5.4% dilution under dirty conditions with a 5 minute contact time (28ml in 500ml).
